

I own several small business. I spend a lot of time on the road between these offices. In order to ensure my safety and prompt service, I use XM Radio's Instant Traffic and Weather. I have also found the importance of being on top of the traffic, because if a delivery needs to get to some one urgently, we can plan the route to deliver accordingly. If the XM Radio is limited to not provide this service any longer, I will be lost. My company and my customers will suffer.
